Why city park facts?

The Trust for Public Land's Center for City Park Excellence works to make cities more successful through the renewal and creation of parks for their social, ecological, and economic benefits to residents and visitors alike. To achieve this mission, we believe that residents, advocates, park professionals, planners, members of the media, decision-makers, and all those who love parks need solid data that elucidates the realities of urban park and recreation systems. Data is knowledge, and knowledge is power.

Our 2016 edition of *City Park Facts* presents the most data yet. New this year is a comparison of the number of individual parks in a city, featured in Table 5.

This year's *City Park Facts* also includes the percentage of residents within a half-mile (10-minute walk) of a park for 75 cities. This metric is generated by The Trust for Public Land's ParkScore analysis, which evaluates how large cities are meeting the need for parks and recreation. The latest rankings are available at **parkscore. tpl.org**.

Additional datasets not included in the printed version of *City Park Facts* are available at **tpl.org/cityparkfacts**. The Center for City Park Excellence has an extensive library of reports on best practices and trending topics in urban park systems; for a full bibliography, visit **tpl.org/CCPE**.

How to use this booklet

When we say "city," we mean only the municipality, not the metropolitan region. Thus, "Los Angeles" means the city of Los Angeles, not greater Los Angeles, nor Los Angeles County. However, several cities that are included in greater Los Angeles—Long Beach, Anaheim, Santa Ana, and Irvine—happen to be large enough to merit separate inclusion in this booklet and are listed under their own names.

When we say "park" we are referring to publicly owned and operated parks. In Table 1, we count every kind of park within the municipal boundary of the city, including federal, state, county, regional, and municipal parks. We do not include private parks such as corporate plazas, private clubs, and homeowner association parks in gated communities.

In most reports we combine the data from all the different park agencies in the city. In a few reports we separate parks by their managing agency, sometimes omitting the various smaller, specialized agencies in a city.

When we say "operating spending" we mean year-in, year-out work such as landscape and tree maintenance, facility maintenance, trash removal, recreational programming, planning, administration, policing, lighting, marketing, etc. "Capital spending" refers to one-time items such as land acquisition, construction, and major road or structural repairs. In order to provide greater uniformity between agencies, we do not count the expenses associated with zoos, aquariums, professional sports stadiums, museums, and cemeteries, which exist in some cities' parks but not others'. In Table 7 and Table 8, total spending includes both operational spending and capital spending. As in 2015, we have included separate information (Table 9) on spending by the largest city park conservancies, a growing category of nonprofit groups that support public parks.

For certain tables, we group cities by their average population density (population divided by municipal land area). We exclude airports, railyards, and parkland – the uninhabited portions of a city – from land area when calculating density. The four density categories are based on standard deviations from the mean.

6. Percent of city population with walkable park access (75 largest cities)

2015

Park access is the ability to reach a publicly owned park within a half-mile walk on the road network, unobstructed by freeways, rivers, fences, and other obstacles. Thus far, park access has been measured only for the 75 most populous cities. For methodology, detailed analysis, and maps of cities' park-poor areas, visit parkscore.org.

The 100 most populous cities

7. Spending on parks and recreation per resident by city

MOST RECENTLY REPORTED FISCAL YEAR

Total spending includes both operating and capital spending of all park agencies in the city, but excludes professional stadiums, zoos, museums, aquariums, and cemeteries. If a city has more than one agency, expenditures are combined. For a more detailed listing of fiscal year data by city, visit **tpl.org/cityparkfacts**.

Spending on parks and

recreation per resident by city

MOST RECENTLY REPORTED FISCAL YEAR

SPENDING BY PRIMARY PARK AGENCY

SPENDING BY ALL OTHER PARK AGENCIES

Total spending includes both operating and capital spending of all park agencies in the city, but excludes professional stadiums, zoos, museums, aquariums, and cemeteries. If a city has more than one agency, expenditures are combined. Italics indicate cities with spending based on past-year information. For a more detailed listing of fiscal year data by city, visit **tpl.org/cityparkfacts**.

*Boston, Cincinnati, New Orleans, and Washington, D.C., have two primary city park agencies.

8. Spending on parks and recreation by city, adjusted for price of living

MOST RECENTLY REPORTED FISCAL YEAR

Total spending includes both operating and capital spending by all park agencies in the city, but excludes professional sports stadiums, zoos, museums, aquariums, and cemeteries. If a city has more than one agency, expenditures are combined. For a more detailed listing of fiscal year data by city, visit **tpl.org/cityparkfacts.**

A price of living score of 100 indicates median housing and transportation costs in the 100 most populous cities. The price of living is calculated using the Center for Neighborhood Technology Housing and Transportation Affordability Index.

11. Designed and natural parkland by city

2015

Designed areas are parklands that have been created, constructed, planted, and managed primarily for human use. They include playgrounds, neighborhood parks, sports fields, plazas, boulevards, municipal golf courses, municipal cemeteries, and all areas served by roadways, parking lots, and service buildings.

Natural and undeveloped areas are either pristine or reclaimed lands that are left largely undisturbed and managed for their ecological value (i.e., wetlands, forests, deserts). While they may have trails and occasional benches, they are not developed for any recreation activities beyond walking, running, and cycling.
